## Google Cloud Partners with CryptoWire to Develop Blockchain and Crypto Ecosystem

BYNEWSDESK JANUARY 6, 2022    MINUTE READ

NEW DELHI: TickerPlant, a subsidiary of 63 moons technologies limited, today announced its collaboration with Google Cloud for the development of the CryptoWire ecosystem, reaching out to all players in the crypto and blockchain industry on a common platform. As an exchange neutral global platform, CryptoWire aims to simplify the digital asset class, blockchain technology, its industry application and empower enthusiasts and professionals to make informed business decisions by providing insight in-depth and cutting-edge knowledge.

Cutting-edge knowledge portals from CryptoWire, CryptoTV and Crypto University will provide a technology-intensive and knowledge-intensive global intervention in the crypto asset and blockchain ecosystem to enable seamless operations and convergence of all applications enabling participants to make informed investment decisions and enable industry use. of the blockchain. Regarding the partnership with Google Cloud, TickerPlant Managing Director and CEO Jigish Sonagara said, "The breakneck pace at which the crypto and blockchain markets have evolved made it clear that we needed a technology partner who can help us evolve in real time.

Working with Google Cloud, we can provide access to people across the world with well-crafted information with speed and precision in a rapidly changing environment and ensure a meaningful approach to fill the information gap. "TickerPlant will leverage the infrastructure scalable, reliable, and high-performance data management tool from Google Cloud to build and scale CryptoWire's applications, as well as to leverage its innovative networking capabilities for video streaming,

content delivery, intelligent business execution and Converging Opportunities.

Google Cloud India Managing Director Bikram Bedi said, “We are excited to provide secure and scalable cloud infrastructure to innovative companies like TickerPlant as it accelerates and expands access to information. of blockchain and cryptocurrency with CryptoWire, and to support them in the development of new ux products and offerings to create value for customers and users. ”

In addition, Mumbai-based CryptoWire will also explore advanced Google Cloud solutions including intelligent data analytics, machine learning, and artificial intelligence to deliver a superior customer experience. TickerPlant COO Rushabh Shah said, “The convergence of Google’s cloud network with CryptoWire, CryptoTV and Crypto University has created a new multifaceted global growth frontier that will be fully utilized by economies, industries, parties. stakeholders, new generation entrepreneurs and professionals.

On Monday of this week, CryptoWire, a global crypto super app that is a special trading unit of TickerPlant, launched India’s premier cryptocurrency index – IC15 to build knowledge about the crypto and blockchain ecosystem. The IC15 is a general market index based on market capitalization rules and tracks and measures the performance of the top 15 liquid cryptocurrencies widely traded and listed on the world’s major crypto exchanges.

Notably, Bitcoin, Ethereum, XRP, Bitcoin Cash, Cardano, Litecoin, Binance Coin, Chainlink, Polkadot, Uniswap, Dogecoin, Solana, Terra, Avalanche and Shia Inu are the constituents of IC15. Last month, global financial content provider TickerPlant unveiled its own cryptocurrency super app, which is meant to be a one-stop destination for cryptocurrency enthusiasts to get real-time price information, breaking news, and more. data and graphics. It will even offer courses related to cryptocurrencies. The super app is available for Android and iOS devices and also has a web browser platform.
