Google Cloud, Cryptowire Collaborate to Develop Blockchain and Crypto Ecosystem

January 6, 2022 admin

Tickerplant has collaborated with Google Cloud to develop the CryptoWire ecosystem that will cater to all stakeholders of the cryptocurrency and blockchain industry on a common platform.

CryptoWire aims to simplify the digital asset class, blockchain technology, its industrial application and empower enthusiasts and professionals to make informed business decisions by providing deep insights and leading-edge knowledge.

CryptoWire's state-of-the-art knowledge portals, CryptoTV and CryptoUniversity will provide technology and knowledge-intensive global interventions in the crypto asset and blockchain ecosystem to enable seamless operation and convergence of all applications to enable participants to make informed investment decisions and use the industry. be enabled. Blockchain.

“The rapid pace at which the crypto and blockchain markets have progressed clearly means that we need a technology partner who can help us scale in real time. Working with Google Cloud, we are increasingly Can provide access to people around the world with well-crafted information with speed and accuracy in a changing environment and ensure a meaningful approach to address the information gap,” said Tickerplant MD & CEO Jigeesh Sonagara said.

Tickerplant will use Google Cloud's high-performance data management infrastructure to build and expand Cryptowire's applications, as well as leverage its innovative networking capabilities for video streaming, content delivery, small business execution and opportunity convergence. In addition, Cryptowire will explore advanced solutions from Google Cloud such as small data analytics, machine learning (ML) and artificial intelligence (AI) to provide better customer experience.

“We are excited to provide innovative businesses like Tickerplant with secure and scalable cloud infrastructure as it accelerates and scales access to blockchain and cryptocurrency information with CryptoWire, and new products and offerings to create value for customers and users.” To support them to grow, said Bikram Bedi, Managing Director, Google Cloud India.
