## Google Cloud Collaborates With CryptoWire to Build Blockchain, Crypto Environs

January 6, 2022 by Kelly Cromley

TickerPlant, an associate firm of 63 Moons Technologies Limited, has entered into partnership with Google Cloud for the creation of the CryptoWire environment, which will serve to all cryptocurrency and blockchain market players on a single network. CryptoWire, as a worldwide marketplace-neutral platform, strives to demystify the virtual asset category, blockchain technology, and also its industrial uses, as well as to enable advocates and experts to make educated business choices by providing in-depth knowledge and cutting-edge information.

CryptoWire's cutting-edge knowledge platforms, CryptoTV and Crypto University, will offer technology and knowledge-centered worldwide intervention in the cryptocurrency and blockchain ecosystems to pave way for seamless functions and consolidation of all apps, allowing users to make informed financial decisions and facilitate industry use of the blockchain technology.

TickerPlant Managing Director and CEO Jigish Sonagara said the following regarding the cooperation with Google Cloud, **“The utter speed with which the cryptocurrency and blockchain sectors have evolved plainly indicated that we required a technology provider that could assist us in scaling in real-time. Partnering with Google Cloud, we can give well-crafted data to individuals all over the globe with speed and precision in a continuously evolving circumstances, ensuring a viable way to resolve the knowledge disparity.”**

TickerPlant will create and broaden CryptoWire's apps on Google Cloud's expandable, dependable, and top performing data administration framework, and also capitalise its groundbreaking network connectivity for streaming video, content distribution, smart business handling, and opportunity consolidation.

**“We are thrilled to offer the safe and expandable cloud framework to innovative startups such as TickerPlant as it expedites and steps-up access to blockchain technology and cryptocurrency data with CryptoWire, and to aid them as they innovate and services to add value for clients,”** stated Google Cloud India Managing Director Bikram Bedi.

Furthermore, the Mumbai-headquartered CryptoWire will investigate Google Cloud’s sophisticated technologies, such as smart predictive analytics, machine learning, and ai, in order to provide a better client experience.

**“The confluence of Google’s Cloud network with CryptoWire, CryptoTV, and Crypto University has resulted in a unique multi-faceted international development frontier to be completely leveraged by economies, enterprises, shareholders, new gen businessmen, and experts,”** stated TickerPlant COO Rushabh Shah.

Notably, a few days before, CryptoWire, a worldwide cryptocurrency super app and a unique business division of TickerPlant, unveiled India’s first cryptocurrency index – IC15 – to increase understanding of the cryptocurrency and blockchain environment. The IC15 is a rule-based wider market index calculated using market capitalization and evaluates the performance of the 15 leading commonly traded liquid cryptos traded on the popular cryptocurrency exchanges.

IC15 is made up of Bitcoin, Ethereum, XRP, Bitcoin Cash, Cardano, Litecoin, Binance Coin, Chainlink, Polkadot, Uniswap, Dogecoin, Solana, Terra, Avalanche, and Shiba Inu. TickerPlant, a worldwide financial content provider, debuted its own cryptocurrency super application in December. The app has been designed to be a single data source for cryptocurrency supporters to obtain real-time pricing, the news updates, statistics, and price trends. It also offers cryptocurrency-related studies. The fantastic software is accessible on both Android and iOS smartphones, as well as on internet browser platform.
